Constanza Giacoboni

Tech Lead | PHP Full Stack Developer

coty.giaco@gmail.com | linkedin.com/in/constanza-giacoboni | github.com/GiacoboniConstanza | giacoboniconstanza.github.io

// professional summary

Tech Lead and Full Stack Developer with nearly 5 years of experience building web-based management systems with PHP (CodeIgniter) and MariaDB. Leads a team of 5 while remaining hands-on in development, managing projects from client requirements gathering through production deployment. Experienced in payment and electronic invoicing integrations, and solid quality practices (CI/CD, automated testing, ISO 9001 processes), applying AI tools to software development.

// work experience

Tech Lead & Full Stack Developer

Nov 2025 – Present

Whitebox

> Leadership & Management

- Lead a team of 5 developers providing support and development for 20+ clients: planning, task assignment and tracking, and code review.
- Scope projects, meet with current and prospective clients, and prepare technical proposals and cost estimates.
- Coordinate the rollout of new developments and their deployment to staging and production environments.
- Evaluated, selected and implemented ClickUp for team management; oversee documentation, tickets and logged hours for ISO 9001 quality audits.
- Manage the internship agreement with Universidad Nacional del Comahue: requirements gathering, coordination with management, interviews and selection. Onboarded 2 interns, 1 of whom was hired as a permanent employee.
- Conduct technical interviews for the team and performance reviews; track working hours and overtime.
- Represent the company at industry events (AOG Argentina Oil & Gas Patagonia, Edifica Neuquén and Expo Vocacional, 2026).

> Engineering

- Re-allocated historical payment records in a management system using diagnostic and correction SQL scripts validated against production copies.
- Delivered security fixes for web applications (XSS prevention and PHP configuration hardening).
- Use AI agent–assisted development, personally reviewing and approving every change.

Full Stack Developer

Oct 2022 – Nov 2025

- Lead author of the CRM for a professional association with about 3,000 users: account ledgers, installment interest, self-service card payments, and PagoTIC and AFIP integrations.
- Developed ERP/CRM modules: suppliers, treasury, accounting with automated journal entries, and payroll.
- Introduced automated testing (PHPUnit) into one of the core systems and wrote a large share of the test suites for three systems, one of them with 300+ tests.
- Built and maintained GitLab CI pipelines and Docker environments with static analysis (PHPStan), coding standards (PHPCS, GrumPHP) and end-to-end tests (Playwright).
- Provided client support, training and requirements gathering within a Scrum framework.

Development Intern

Dec 2021 – Sep 2022

Instituto de Seguridad Social de Neuquén (ISSN)

- Developed and maintained applications in GeneXus 15.
- Enhanced and supported the online self-service portal (Oficina Virtual) built in ReactJS and integrated with a GeneXus API.
- Managed PostgreSQL databases with pgAdmin.

// personal projects

A Medias · a-medias-delta.vercel.app

Installable web app (PWA) for shared finances among people who live together: expense splitting proportional to each person's salary, savings funds, shared goals with charts, and due-date reminders. Own design; mobile-first and accessible.

Stack: React, TypeScript, Vite, Tailwind CSS, Supabase (Auth, PostgreSQL with Row Level Security), Vercel.

// skills

backend

PHP 8 (CodeIgniter 3 & 4, Shield) · Composer · Java (basic)

frontend

JavaScript · TypeScript · React · jQuery · Tailwind CSS · Bootstrap · DataTables

databases

MariaDB/MySQL (stored procedures, window functions, transactions) · PostgreSQL · Supabase

devops

Docker · GitLab CI/CD · Git (GitFlow, worktrees) · Linux · SSH · Vercel · monitoring (GlitchTip, Uptime Kuma)

quality & testing

PHPUnit · PHPStan · PHP_CodeSniffer · GrumPHP · Playwright

integrations

Mercado Pago · PagoTIC · AFIP/ARCA electronic invoicing · Google APIs

ai-assisted development

Cursor (coding agents) · per-project orchestration of AI assistants · GitHub Copilot · ChatGPT · Gemini · Grok

management

Scrum · ClickUp · ISO 9001 standards · requirements gathering and estimation

// education

Information Systems (B.Sc. program, coursework completed through 3rd year, not finished)
Universidad Nacional del Comahue · 2020 – 2024

Full Stack Web Programming (318 hours)
Educación IT, scholarship from PAE, Centro PyME-ADENEU and Fundación Pescar · 2021

High School Diploma in English and Computing
Instituto Nuestra Señora de Fátima · 2019

// courses & events

Phishing Attack Dōjō
KnowHow Security Labs (KHSEC) · 2026

Patagonia Cybersecurity Day
2026

4th Patagonian Congress on Ethics and Compliance
Fundación Potenciar · 2026

Workplace Tools and Skills (Herramientas y Competencias para el Mundo del Trabajo)
Fundación Pescar · 2021

// languages

Spanish: Native.

English: Cambridge First Certificate (FCE), 2019 (B2).
